

FULL STACK PROGRAMMER

100 %

Starting in June or – heck, why not – even tomorrow, we're looking for a full-stack programmer to support us on a big mission: enabling educational institutions all over this big ol' earth to make it possible for their students to learn and practice for exams through a social, competitive, and digital game-based app.

What kind of guy or girl we're deaming of? Creative, open-minded and energetic with a lot of experience in, and talent for, app development.

Who are we, you ask? Well, it's kind of you to inquire. We're a boutique consultancy and design agency in Zurich. Our daily bread? Handling complex content of all kinds – all in the service of creating meaningful, sensual and ... slightly insane stuff.

Our services include (but are not limited to!): strategy mobilizations, internal/external communication, science communication, and film productions. Our product range includes (animated) films, infographics, hidden object images, websites, and mobile games. You name it – if it's cool, we do it.

YOUR RESPONSIBILITIES:

- Development of a mobile app (cross platform) from scratch to MVP ... and beyond
- You will manage and code the app's front-end with ease, while you know what strings to pull for the backend
- The entire development process is well planned and in the best hands with you

WHAT YOU BRING TO THE PROVERBIAL TABLE:

- You come with a track record of at least one project in which you handled front- & back-end coding
- You're proactive and eager to express yourself
- Your mind is quick and perceptive
- Expertise in web development is a plus
- You love to learn and grow

WHAT WE BRING TO SAID TABLE:

- Plenty of freedom for your own personal development
- Opportunity to express your own ideas, wishes and fantasies
- Prospect of company shares in spin-offs
- Creative, young, curious, fun and playful work colleagues
- Work in an interdisciplinary and constellated team – and an equally interdisciplinary field
- Tasks that challenge both your analytical and creative sides (although we don't really believe in all that right-brain, left-brain piffle)

The table itself:

Does this sound tailor-made for you? Then drop whatever it is you were doing and send us your CV (incl. portfolio), and a brief but all the more riveting cover letter.
