

PROJECT MANAGER

100 %

At Zense, our daily bread is handling complex content of all kinds – all in the service of creating meaningful, sense-making and ... slightly insane stuff. We're looking for a smart, engaging person to join our team as a project manager (and consultant). Your (most important) task? Helping well-known Swiss and international clients communicate complex messages in a memorable and effective way.

Sounds simple, doesn't it? Therein lies the challenge! From illustrations to storyboards, visualizations to videos, we ask you to think outside the box, let your creative juices flow, and take our clients where no dime-a-dozen consulting agency has taken them before.

We'll also ask you to put forward your own ideas, play around with some crazy new business concept on the side, and get stuck in on day one.

What kind of guy or gal are we (day-)dreaming of for this awesome role? We prize (not necessarily in this order): analytical ability, creativity, a sense of humor and ... a willingness to be bold and inventive.

YOUR RESPONSIBILITIES:

- understanding (first and foremost) and reframing (not just rehashing!) the business and communication strategies of international clients, big and small
- owning your projects and spicing them up with your own ideas
- structuring and preparing content of all kinds (conceptual work, writing, proofreading, editing, sketching, storyboarding)
- driving change with our own ventures (e.g. www.kitkitkit.ch)
- breaking new ground with your own client acquisitions

WHAT YOU BRING TO THE PROVERBIAL TABLE:

- a must: a university degree (preferably in economics or business)
- prior experience in consulting or with an agency
- fluency in German and professional proficiency in English
- ability to learn quickly, a structured approach to tasks, enthusiasm, dedication, creativity ... and a sense of humor
- a passion for story-telling in all its forms (visual arts, movies, pop culture)
- a taste for and understanding of design and aesthetics
- knowledge of the most commonly used Adobe programs would be extra cool

WHAT WE BRING TO SAID TABLE:

- the opportunity to take charge of projects that will challenge your analytical-thinking skills as well as your creative side
- lots of freedom for your own personal development: with us you have room to run!
- the chance to express your own ideas, wishes and yes ... even your (professional) fantasies
- creative, curious, fun, and playful work colleagues
- the chance to work in an interdisciplinary team – and in an equally interdisciplinary field

Does this sound tailor-made for you?

Then drop whatever it is you were doing and send us your CV and a brief but all-the-more-riveting cover letter.
