

FULL-STACK PROGRAMMER

80-100%

As of now or by agreement, we're looking for a savvy person to help us move organizations with sense and sensibility - and a little bit of nonsense.

What kind of guy or girl we're dreaming of? Creative, open-minded, and energetic with a lot of experience in, and talent for, software development.

Who we are? Zense is a Zurich-based consultancy, whose daily bread is handling complex content of all kinds – all in the service of creating meaningful, sensual, and... slightly insane stuff. Our services include explanatory products (animations, infographics, interactive websites), gamification solutions, science communication, and change mobilisations for companies of all sizes and industries.

YOUR RESPONSIBILITIES:

- development of websites, progressive web apps, games, and maybe even native apps using frameworks
- the entire development process is well planned and in the best hands with you

WHAT YOU BRING TO THE PROVERBIAL TABLE:

- you have a crush on linear algebra
- you are familiar with modern web technologies (frontend wizard, solid backend skills)
- you are experienced with Canvas such as WebGL or Canvas2D
- you come with a track record of at least three awesome projects
- you're curious regarding new web technologies such as WASM
- your mind is quick and perceptive
- you love to learn and grow

WHAT WE BRING TO SAID TABLE:

- creative, curious, fun, and playful work colleagues
- the chance to work in an interdisciplinary team – and in an equally interdisciplinary field
- tasks that challenge both your analytical and your creative thinking
- the opportunity to express your own ideas, wishes, and fantasies
- plenty of freedom for your own personal development
- a trusting working environment with a lot of flexibility (e.g. regarding work execution, work location, ...)
- possibility to take unpaid leave

Does this sound tailor-made for you? Then drop whatever it is you were doing and send us your CV, some work references, and a brief but all-the-more-riveting cover letter at jobs@zense.ch.
